

**CLAIMS**

What is claimed is:

5

1. An apparatus comprising: an upright stand terminating at an upper end thereof, with an integral frame defining an aperture; the frame and the upper end of the upright stand joined at a crotch; and, a tie-on terminal extending from the crotch, upwardly into the aperture.
- 10 2. The apparatus of claim 1 wherein the upright stand is generally cylindrical.
3. The apparatus of claim 1 wherein the upright stand is generally cone shaped.
4. The apparatus of claim 1 wherein the upright stand is generally rectangular and upwardly tapered.
5. The apparatus of claim 3 wherein the upright stand comprises plural contiguous, coaxial,  
15 sections including a base section, a center section joined to the base section at an inwardly directed annular step, and an upper section joined to the center section at an outwardly directed annular step.
6. The apparatus of claim 3 wherein the upright stand comprises two contiguous, coaxial,  
20 sections including a central section, and joined to the central section at an outwardly directed annular step, an upper section.
7. The apparatus of claim 1 wherein the tie-on terminal is in the form of a mushroom.
8. The apparatus of claim 1 wherein the tie-on terminal is in the form of a shaft with outwardly extending pimples adjacent an end of the shaft.
9. The apparatus of claim 8 wherein a terminal end of the shaft provides a bolt hole therein.
- 25 10. An apparatus comprising in combination: a plurality of spaced apart delimiters, each of the delimiters providing at an upper end thereof, an integral frame defining an aperture; the frame and the upper end joined at a crotch; and, a tie-on terminal extending from the crotch, upwardly into the aperture; and a flexible elongate member wrapped about the tie-on terminal of each of the delimiters in turn to define a boundary.
- 30 11. The apparatus of claim 7 wherein the flexible elongate member is a crime scene control tape.
